

75 Years – Scoring with high Performance

The Schäfer & Flottmann oHG was founded by Fritz Schäfer and Heinrich Flottmann on 1st of April 1951.

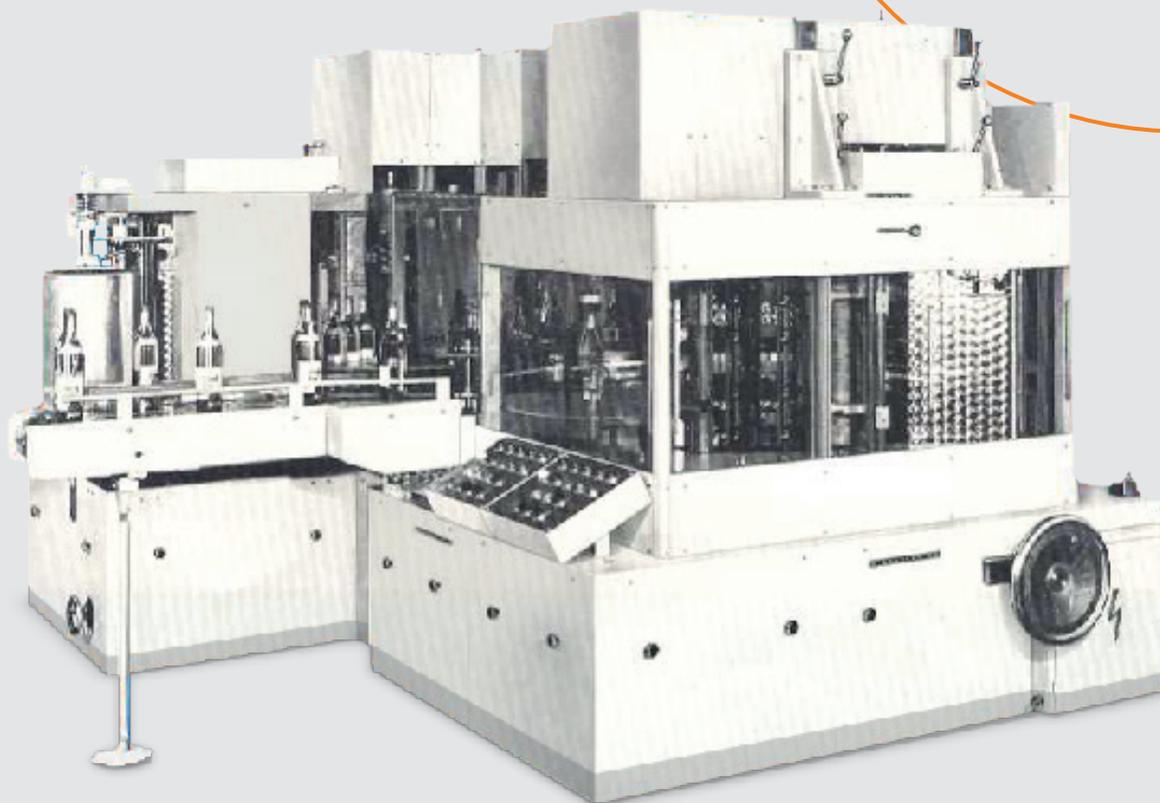

For 75 years now, innovative machines have been developed, built and exported worldwide on the former site of the colmine „Vereinigte Trappe“. An occasion to look back at some of the **highlights** from 75 years of mechanical engineering by Schäfer & Flottmann in Gevelsberg-Silschede.

SFS 25

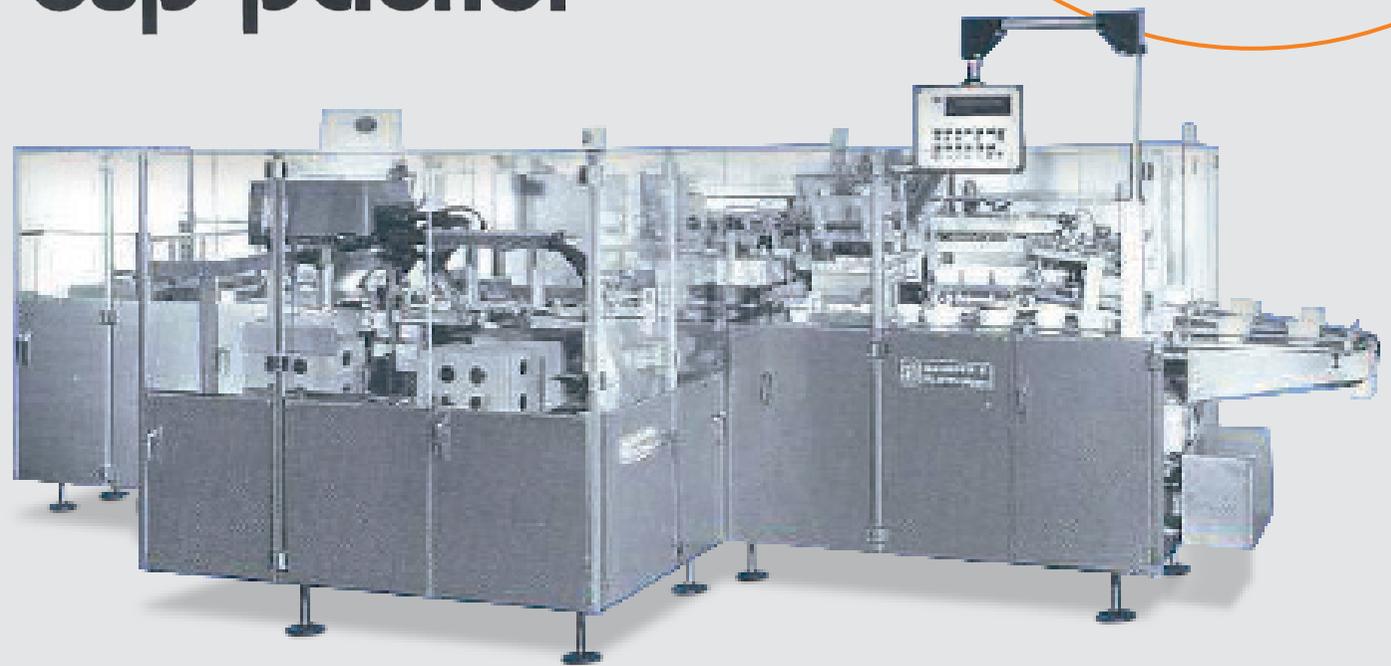

Sensitive product handling right from the start. At the beginning of Company's history, the founders start with the design and manufacturing of **wrapping machines for civil explosives** for the mining industry.

SFS 80 / SFS 165

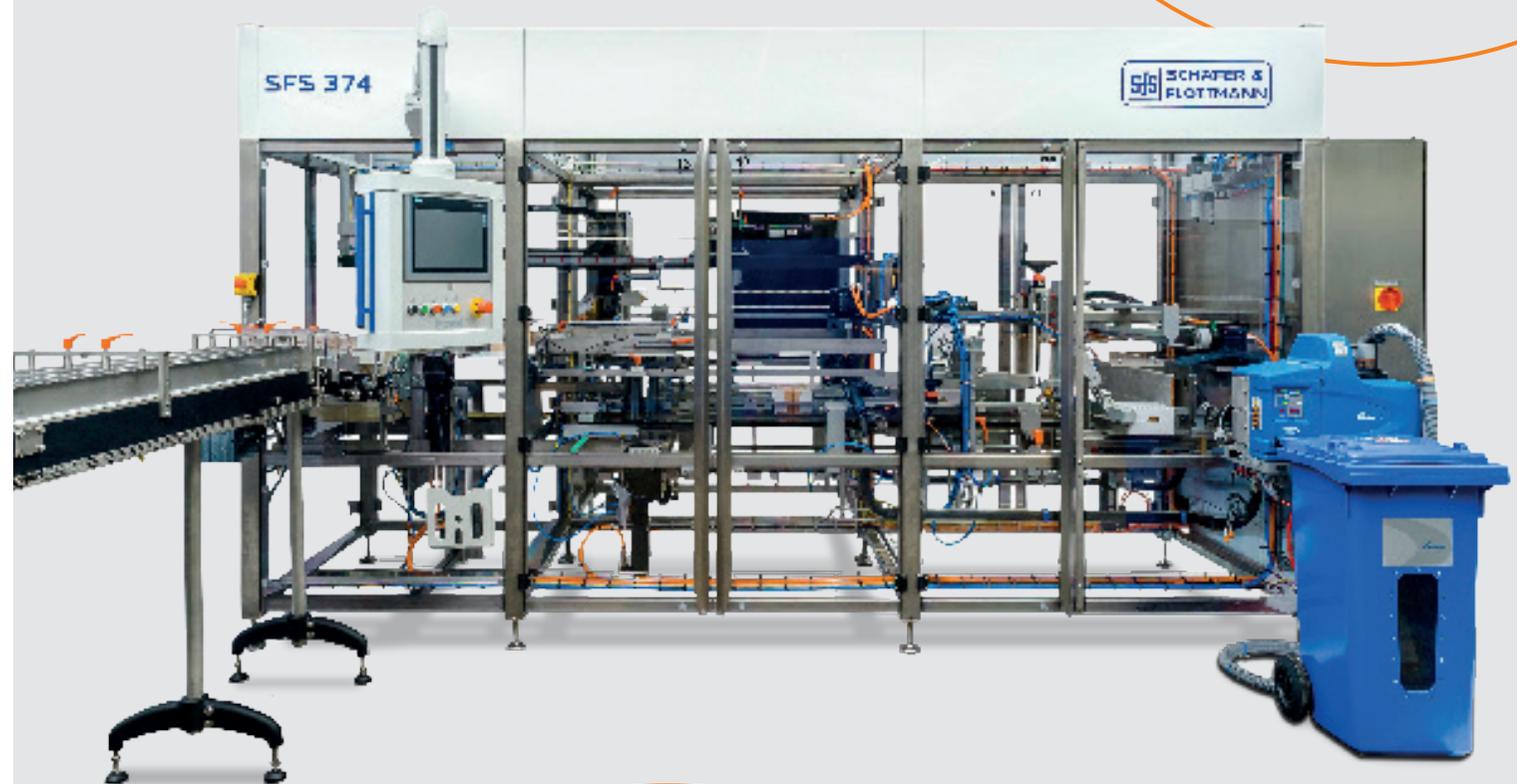

„Well packed is as good as sold“ was the message shortly after the foundation. Wrapping bottles in cellophane film or tissue paper was the defining factor in becoming an expert in packaging machines in the secondary packaging sector. That was the start for the export of Schäfer & Flottmann machines all over the world.

sfs 332 super cup packer

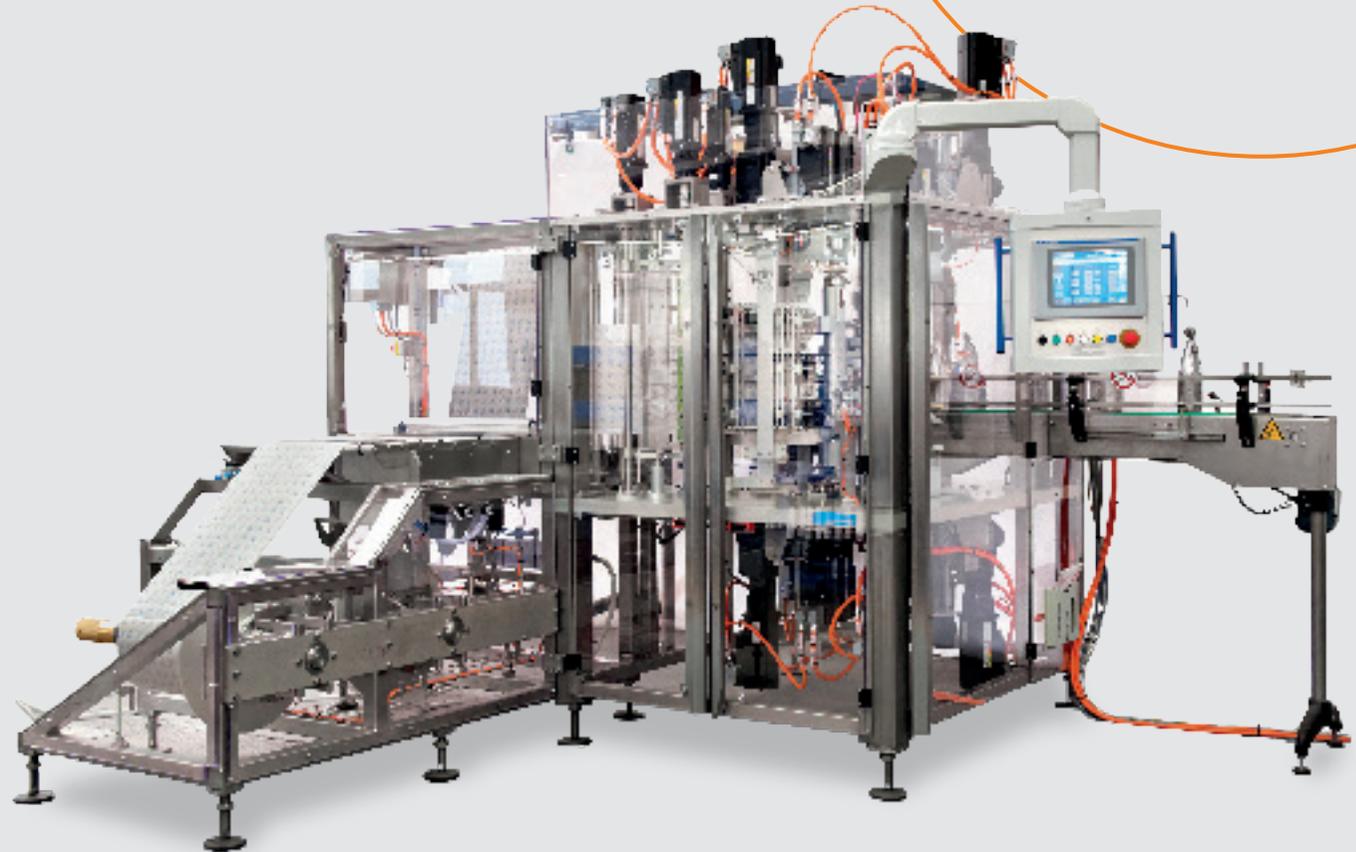

SFS 332

"**Super Cup Packers**" are still built by Schäfer & Flottmann today, even though the machine name has changed over the years. Cup packing, featuring solutions for the medium to high performance segment, is one of Schäfer & Flottmann's core areas of expertise.

SFS 374

The figure "374" is known all over the world. **From Canada to New Zealand**, butter and margarine producers pack their sensitive products quickly and safely in shipping cartons on the SFS 374 packaging machine.

SFS 446

Schäfer & Flottmann never forgot how to "wrap" over the years. From bottles to **sugar cones**. New markets have been reached and innovative solutions have been developed by customized special designs.

SFS 350/SFS 337/SFS 501

Schäfer & Flottmann is also able to score with "high performance" with regard to Carton and Tray Erectors. **Up to 60 units per minute** can be produced on our systems. In combination with a Pick-and-Place System, the Erecting Unit becomes a complete Packaging Machine.

SFS 414 / SFS 425

With the SFS 414 / SFS 425 modular system, Schäfer & Flottmann covers the full range of **wrap-around/tray packaging** on the basis of a well proven platform, up to the high performance range.

Worldwide

We would like to thank our worldwide network of customers, our team of employees, representatives, suppliers and partners for the successful and long-lasting cooperation in the past years, respectively decades. Now we are looking forward to upcoming challenges and continued cooperation in the realization of future projects.
